

INTERNATIONAL EXHIBITOR PAVILION IN MARBLE

MARBLE - International Natural Stone and Technology Fair, one of the milestones of natural stone and technologies sector, will present country pavilions for the first time this year.

Cooperation with the Marble Institute of America (MIA), one of the biggest natural stone organizations in the world, has been started.

MARBLE - International Natural Stone and Technologies Fair, one of the most important meetings in natural stone sector in the world, will host sector professionals from various countries between 28 and 31 March 2018 at Fuarizm, the largest and most modern exposition center of Turkey.

Having finalized the fair with 213 exhibitors from 30 countries and 8,965 foreign visitors from 104 countries in Asia, Europe, Africa and America; MARBLE concentrates on foreign works in order to increase national participation of countries.

International Exhibitor Pavilion will be built for the first time

International exhibitor pavilion will be built this year for the first time in line with the works carried out to increase the number of international exhibition to MARBLE – International Natural Stone and Technologies Fair being among the top three fairs of the world in natural stone sector.

The companies from foreign countries will get an opportunity to exhibit their products in the booths of their own country in the pavilion to be built in Hall C. An increase is expected in the number of exhibitors this year with the international exhibitor pavilion to host many foreign countries from Asia, Europe, Africa and America.

Cooperation with MIA have been started

MARBLE will cooperate with Marble Institute of America (MIA) - one of the biggest natural stone organizations in the world. While MIA is expected to participate in the fair as an exhibitor, it will also give seminar and preparing a user guide that involves all the sector components of natural stone from producers to sellers.

Ideas will be displayed

Another innovation to take place within the scope of the fair will be the 1st Young Creative Ideas Platform. With this platform, young designers from age of 18 to 30 will get together with the innovative companies of the sector in such fields as industrial design, interior architecture, landscaping, and architecture. Therefore, visionary young designers to shape the future technologies will be brought to the natural stone sector in Turkey and in the world.
