SUSTAINABLE HOSPITALITY

Interior Designer Andrea Auletta has created eco-sustainable hospitality for the E.C.HO. Hotel, a Starhotels chain in Milan.

Sustainability in an urban context, that's E.C.HO., ecological hotel of the Starhotels Group. The theme of sustainability finds a strong and persuasive interpretation in the E.C.HO. Hotel in Milan, whose acronym sums up a cluster of concepts under the sign of sustainability and contemporaneity immersed in a magical and surprising atmosphere. E.C.HO. of the Starhotels Group is a place of eco-sustainable hospitality created by the interior designer Andrea Auletta. Nine months of work and an investment of over 13 million euros led to the construction of this hotel featuring original design and green soul with 143 rooms, of which 13 suites and junior suites. The structure of the building is rigorous in the external lines, consistent with the urban context, to enclose fluid interiors thanks to the plasticity of the glass, the lightness of the dehors, and a skillful renovation with a careful redistribution of volumes. The result is a wide, airy, functional space with a natural and dazzling mood.

PANDEMIC ARCHITECTURE

The pandemic has thrown many new surprises at us, making us relook our spaces, explore with us on this ever-evolving journey...

While the ongoing COVID-19 pandemic has caused a disturbance in many different industries and ways of life, it has reshaped the architecture and design industries as well. Design and innovation have always been the driving forces behind architecture. With COVID-19 reshaping what we define as 'normal', the field of architecture seeks to address the various challenges put forth by the pandemic. While the duration of this current pandemic is unknown, it is a good time to anticipate possible architectural developments in the future and learn how to react to them. We share some of the possible architectural changes that are happening in this ongoing and post COVID 19 scenario.
