FOSTERING A COMMUNITY

BEEAH announces Khalid Bin Sultan City masterplan designed by Zaha Hadid Architects

Designed by Zaha Hadid Architects (ZHA), the masterplan for Khalid Bin Sultan City is adjacent to BEEAH's acclaimed headquarters in Sharjah. Anchored by four guiding principles—sustainability, smart technology, culture, and people — ZHA's design continues the philosophies embedded with the architecture of the renowned headquarters building, drawing inspiration from the fluid forms of wind-swept desert dunes to define a multi-centered urban network with seven distinct residential neighbourhoods interconnected by sheltered walkways and vibrant streetscapes.

EVENTS

Large-scale images transform the entrance portico at Cersaie 2025

Visitors to the 42nd edition of Cersaie, to be held in Bologna from 22 to 26 September 2025, will be welcomed by a new entrance portico designed by architect Dario Curatolo, showcasing a series of large-scale images of ceramic materials and products. These visuals will highlight various aspects of ceramics, from form and colour to function and technology, and above all the material's intrinsic beauty.

With an extra 10,000 square metres of space compared to 2024, the show's layout has been completely reorganised across the fully booked 155,000-square-metre exhibition floor. Four halls, one more than previously to accommodate requests from first-time exhibitors, will be dedicated to bathroom furnishings, positioned strategically at key intersections and surrounded by eight halls presenting the latest innovations in ceramic tiles and slabs.

BLACK AND WHITE BEAUTY

Antoniolupi's Sculptural Basins now at Valueline

Valueline, a trusted name in premium home solutions since 2002, continues to elevate Indian interiors with the celebrated Italian brand Antoniolupi, known for its bold design language and artisanal precision. The Fonte and O24 freestanding basins capture the essence of modern luxury with clean lines, bold geometry, and classic monochrome palette.

The O24 basin is a striking study in geometry and contrast. Made from 24 recycled wedges of white Carrara and black Marquinia marble, the radial design is both sculptural and sustainable. Bonded with dark resin, it creates a bold visual statement while remaining surprisingly lightweight. Its columnar form and crisp lines bring balance and power to any bathroom space, perfectly suited for contemporary homes that cherish graphic and architectural touch.
