2020 has been revolutionary in many ways, our lifestyle has changed, and everyone has been cocooned inside their homes and spending more time indoors. We all somehow learned to maintain a balance between staying calm and aspirational. Inspired by this phase, Pantone announced 'Illuminating' which is a bright yellow color and 'Ultimate Gray', together they bring about a sense of composure and resilience. Today, with maximum time being spent at home, it's important to brighten our nests to be able to rise and shine. As we constantly crave for an encouraging and positive space around us, it is a good idea to add these colours for a fresh new look!
