NOVELTIES ON DISPLAY

International Bathroom Exhibition at Salone Del Mobile. Milano 2022!

At the 8th edition since the creation of the Salone del Mobile. Milano, the International Bathroom Exhibition confirms companies' trend towards products that combine design with eco-friendly functionality, ranging from water saving to the use of low-impact, recyclable and circular materials, digital activation systems and voice recognition to taps and fittings that reduce consumption by as much as 50%. Furnishings, accessories, shower cabins, porcelain sanitary wares and radiators all the way to taps and bathtubs with minimal visual impacts or a wealth of allusions to nature, sometimes even playing with irony. The twin of DESIGNin the Kitchen, DESIGNin the Bathroom is the installation curated by the architect Alessandro Colombo with Paola Garbuglio devoted to bathroom products. Featuring winners of the Compasso 'd Oro, it presents furnishings that dialogue with and around water and that have made their mark in the history of lifestyle, society and the modern home.
