TILE TRAVELOGUE

MEDITERRANEAN RAGUSA

Dubrovnik historically known as Ragusa is one of the most prominent tourist destinations in the Mediterranean Sea, a magnificently intact walled city with stunning architecture.

Dubrovnik historically known as Ragusa is a city on the Adriatic Sea in the region of Dalmatia, in southern Croatia. It is one of the most prominent tourist destinations in the Mediterranean Sea, a seaport and the centre of Dubrovnik-Neretva County. It is also a magnificently intact walled city on the Adriatic Sea at the extreme coast of Southern Croatia. The city is protected by defensive walls, majorly built in the 15th and 16th century.

PROJECT

TOMORROW'S DREAM

Gratitude Villa, is an award winning project designed by Architect Trupti Doshi of Auroma Architecture. It is a futuristic “House for Tomorrow” which is built for modern needs while at the same time being highly sustainable in its form and function.

Auroma architecture firm in Puducherry, Tamil Nadu, India is headed by a sister-brother duo - Trupti and Viral Doshi, who lead a diverse and competent team of highly talented professionals from the fields of Architecture, Engineering, Sustainability, Water, Waste, Energy, Site Management, Construction and Allied Services. Architect Trupti Doshi has 20 years of experience in ecological architecture and sustainable engineering. She has been India’s youngest woman architect whose work has been featured by the United Nations Environment Program as a model for Sustainable Development in India. Viral is a sustainability engineer and entrepreneur who is passionate about making a positive difference in the world. He is a creative problem solver with vast experience in running and managing multiple businesses.

NAVAL MASTER

Any discussion on naval architecture is incomplete without the mention of architect William Francis Gibbs, we explore his life and work...

American architect and engineer William Francis Gibbs was famous for naval architecture and for designing cargo-carrying Liberty ships. He made many improvements in ship design and construction, notably in the passenger liner "United States". He was born on August 24, 1886 in Philadelphia to financier William Warren Gibbs and Frances Ayres (Johnson) Gibbs. He graduated from the DeLancey School in 1905 then entered Harvard College where he followed his own curriculum of science and engineering, studying plans of British battleships in his dormitory room.
