PROJECT

LUMINOUS ATMOSPHERE

COR Architecture + Design transforms a nursery school with WOW ceramics

The studio COR Architecture + Design led the expansion of the Santiago Apostol Nursery School in Albatera — an intervention that goes beyond functionality to become an architectural reflection on childhood, learning, and shared space.

In contrast to the original building— a simple gabled structure — the new volume proposes a clear and striking geometry that enters into dialogue with the existing architecture while asserting its own identity. The most powerful gesture of the project is the porch: a “pink inner shell” that opens to the outside, transforming the entrance into a welcoming, warm, and symbolic stage.

INNOVATION

UNDERSTATED LUXURY

Valueline revolutionizes sintered stone technology with Neolith's new Classtone, Fusion and Steel Collection

Valueline, a leader in premium home solutions since 2002, presents Neolith's latest collections: New Class tone, Fusion and Steel. These innovative sintered stone surfaces blend aesthetics with durability, offering a refined yet practical solution for modern interiors.

The New Classtone Collection reimagines nature's finest stones with advanced technology and elegant finishes. Calacatta Luxe mirrors the grandeur of Italian marble with bold veining and comes in Décor Polished and Ultra Soft finishes. Calista Silk, inspired by natural limestone, offers a warm, sophisticated appeal with a soft Silk finish. Abu Dhabi White Silk, influenced by Middle Eastern architecture, features a neutral-toned surface with a fine-textured sheen, adding understated luxury.

The Fusion Collection brings together natural beauty and contemporary design. Mont Blanc Silk recreates the timeless charm of white quartzite with a smooth, matte texture.
