THE LIVING LANDMARK

The Round Tower in Copenhagen, Denmark, is a living landmark, we explore...

The Round Tower, formerly, Stellaburgis Hafniens, is a 17th-century tower located in central Copenhagen, Denmark, and one of the many architectural projects of Christian IV of Denmark, built as an astronomical observatory. It is most noted for its equestrian staircase, a 7.5-turn helical corridor leading to the platform at the top (at 34.8 meters above ground), and for the expansive views which it affords over Copenhagen. The tower is part of the Trinitatis Complex which also provided the scholars of the time with a university chapel, the Trinitatis Church.

CERSAIE 2022

This year, Cersaie comes with a special, 'Cersaie Upstairs', we present a sneak peek...

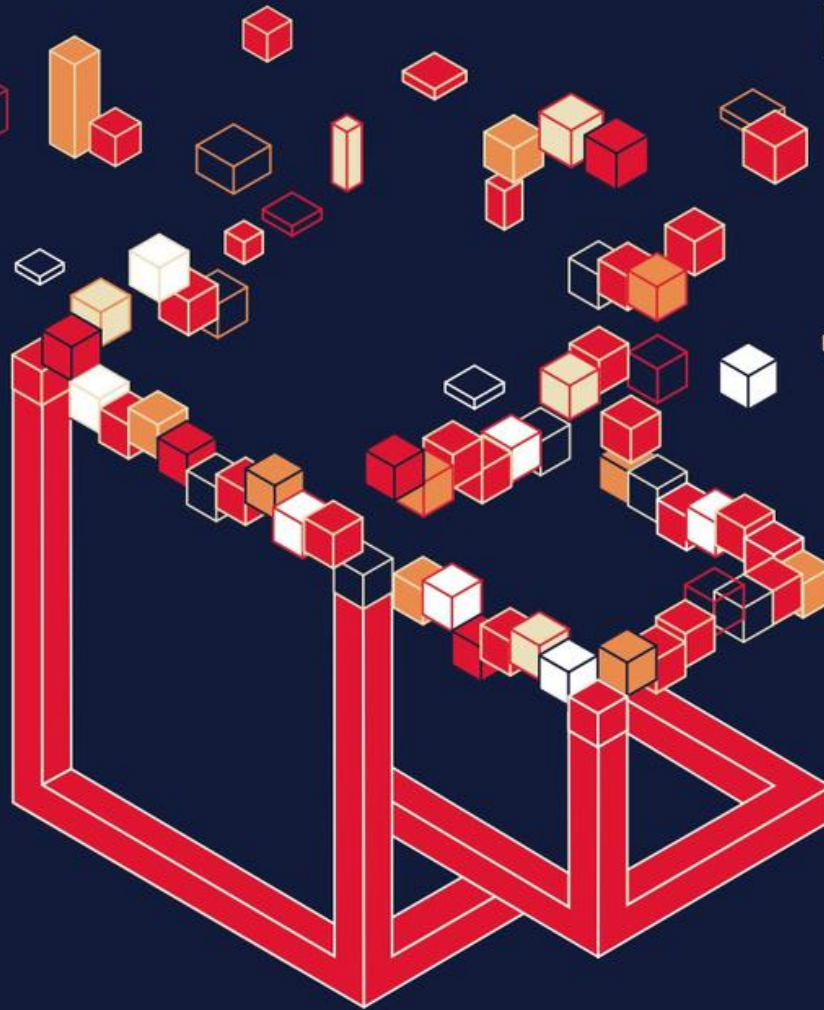

This year's Cersaie, the International Exhibition of Ceramic Tile and Bathroom Furnishings to be held in Bologna from 26 to 30 September, will feature an additional level with new spaces and functions. One of the new aspects of the 39th show will be Cersaie Upstairs, an upper-floor walkway connecting the historic exhibition halls with the newly built pavilions. The entrance to the walkway will be via the external escalators adjacent to Hall 19/20, from where it will extend to Gallery 21/22 and Gallery 25/26. This new itinerary will offer visitors an exciting new sensorial, relational and cultural experience along with the chance to take part in recreational and culinary activities. The new space is inspired by the theme of the elements from which ceramic products are made: air, water, earth and fire. Gallery 21/22 will host the third edition of Archincont(r)act, the exhibition aimed at the world of architecture and contract design which this year will see the participation of 6 major architecture firms
