CERSAIE 2026

The 43rd edition of Cersaie returns to the Bologna Exhibition Centre from 21 to 25 September 2026

Cersaie 2026 will cover 155,000 square metres of exhibition space, reaffirming its position as the leading international event for ceramic surfaces, bathroom furnishings and architectural design.

Cersaie once again confirms its role as an international forum for discussion on architecture and design, with a programme featuring some of the world's leading architects and the industry's foremost publishing houses with its, "The Building, Dwelling, Thinking" cultural programme.

PRODUCT INNOVATION

MODERN LINES

System Ceramics introduces, Speed Wrap, a high speed packaging solution for ceramic tiles

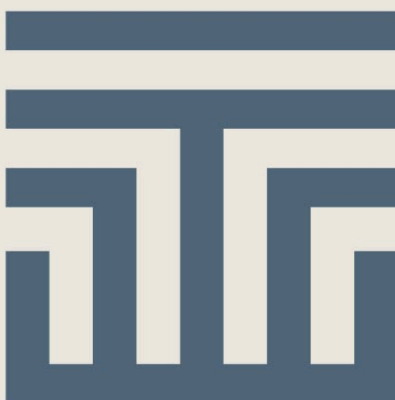

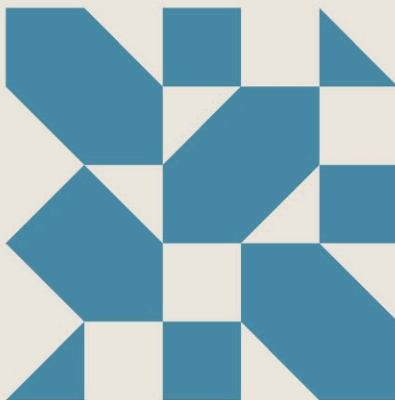

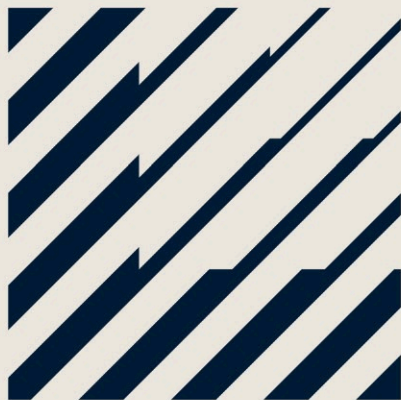

In the ceramic industry, packaging plays a role that goes beyond simple protective wrapping. It is the first point of contact between product and market, an element capable of conveying quality, care, precision, and brand value even before use.

In this scenario, characterized by growing attention to aesthetics and customization capabilities, end-of-line systems must evolve alongside technologies. With Speedwrap, the new high-speed horizontal packaging machine, System Ceramics addresses this challenge and offers a solution designed to meet increasingly complex requirements: fast cycles, reliable protection, and visual consistency.

High speed and production continuity

Within industrial lines, packaging represents a critical point. Speed often makes the difference between maintaining smooth production or creating bottlenecks, as even small slowdowns can compromise overall efficiency.
